

Brief

Summary

The Afrix is the token of the WethioX crypto-asset exchange platform.

A token is a unit of value created on the Blockchain that can be traded on the market or used on an ecosystem.

Our goal is to become the market leader within 48 months, from the launch of the platform in its final version on the segment of ethical platforms (Sharia compliant for the Muslim world and ethical finance for non-Muslims).

The Afrix will offer multiple uses on the WethioX platform (payments, transactions, reduced user fees, etc.) and above all a very high potential for return on investment.

Challenge

Currently, traditional crypto-asset platforms reproduce the same drifts as traditional finance and no longer meet the demand of people wishing to invest with respect for a vision and ethical value in their choice of supports and services.

Indeed, all toxic services of speculation (short sale, option, future ...) and usury (leverage, interest loans ...) are present today.

To date, there is no platform offering this type of approach as complete and insightfull as WethioX.

Solution

In order to meet this challenge, our team has developed an exchange platform called WethioX (Which means exchange In Wolof, Senagalese language), with a purely ethical vocation and which does not incorporate any of these toxic services.

The specificity of this platform therefore consists of ethical finance that complies with Sharia law.

Our objective of becoming the market leader in 48 months is achievable, because the particularity of WethioX, in its choice to fight against speculative drifts, gives it a considerable competitive edge, compared to existing conventional platforms, which opens a multi-billion dollars international market.

Team and Offices

Our team benefits from a long experience of several years in the field of cryptocurrency and **already has 4 ICOs** (Initial Coin Offerings) carried out successfully. Also, we have more than ten years of experience in the marketing and development of new digital technologies.

Our teams are based in Zurich for Europe, Marrakech for Africa, Dubai for the Middle East and soon Singapore for Asia, in order to be able to cover as many areas of the world favorable to cryptocurrency and Blockchain as possible.

Therefore, this will allow WethioX to capture more and more users.

Timeline

Technical Infos

- Token Symbol: **AFX**
- Number of Afrix: **770,000,000**
(existence of the "burn" function, allowing the number of tokens to be reduced)
